works for you

XtremeClean

Automatic Filter Cleaning System

Niifisk-ALTO XtremeClean system is extremely efficient and completely automatic. All you have to do is start the vacuum!

The filter is automatically cleaned every 20 seconds while you work. There is no need to interrupt your work.

Compact design and high performance are key features in XtremeClean technology. Two curved flat nanotechnology filters maximize the container volume and improve efficiency even more.

A servo motor controlled Y-FLAP ensures precise reversed air flow and prevents power loss during operation. Powerful air pulses clean the filter gently and keeps suction performance constantly high.

Concentrate on your task, and let XtremeClean take care of the filter.

Push&Clean

Fast and simple filter cleaning

If you work with fine dust, you are surely familiar with the dreaded task of cleaning clogged filter cartridges to restore normal suction performance.

With Push&Clean, all you have to do to clean the filter is block the inlet fitting or the hose, and push and release the filter cleaning button. The surrounding air enters into the container, passing through the filter cartridge in the opposite direction to clean the filter gently. Dirt is blasted off and high suction performance is restored— you are back to work in no time.

1. Block the hose inlet.
2. Push and release the button.
3. Air pulses in to clean the filter.

Vacuums that work as hard as you do.

For hands-on users in rugged applications, Nilfisk-ALTO wet/dry vacuums deliver performance, efficiency and reliability as standard. Only Nilfisk-ALTO is backed by more than a century of vacuum and filtration expertise, and offers as many features and functions to meet your specific application needs.

- Push&Clean filter cleaning
- XtremeClean automatic filter cleaning
- Washable PET fleece filter
- Silent power
- Multiple capacities
- MultiFit accessory system
- Auto start for electric/pneumatic tools
- HEPA filtration
- Speed control

ATTIX 30 - Perfect for professionals on the move

The ATTIX 30 represents a new possibility of achieving superior suction power in a durable, flexible wet/dry vacuum. It features ergonomic design in a slim package that is easy to transport and store.

ATTIX 50 - When you need more container volume

The ATTIX 50 is the solution for demanding users with a high frequency of cleaning. User-friendly operation and functional design ensure better performance and reliability, with wet and dry capabilities.

ATTIX 19 - Powerful and rugged wet/dry cleaning

The ATTIX 19 offers power in the form of two-stage turbines, but at a silent level of 57 dB(A). Its steel frame and canister make it rugged and dependable, while still easy to handle. The tilting, removable container is extremely user-friendly.

Applications

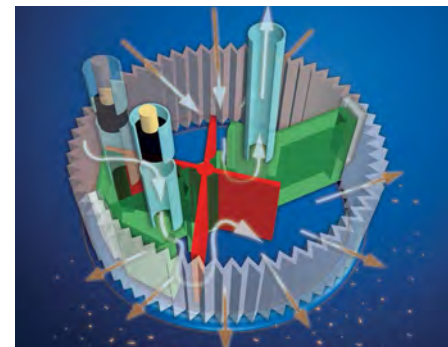

- Building & construction
- Oil & lube
- Automotive
- Fire restoration
- Body shops
- Industrial
- Manufacturing
- Hospitality

Sturdy grip for easy transport and cable storage.

Improved accessory storage and tool deposit.

Filter cleaning options to finish the job faster.

Tilt the container to empty, or simply lift it out of the frame to dispense of its contents.

With a comfortable, integrated handle, it's easy to take the Attix 19 wherever the you work.

Fleece bags available for easy clean-up of debris.

Proven reliable in tough environments.

ERGONOMIC DESIGN

Comfortable handle, tilt or lift-out container, handy tool tray and suction tube holder.

HIGH PERFORMANCE

Two-stage turbines and bypass motors

SILENT POWER

Works at a low 57 d(B)A

VERSATILITY

Tilting, removable container; optional features including XtremeClean and Automatic On/Off

STURDY

Steel frame and stainless-steel canister
