

HYDRAULIC ELECTRIC & MANUAL CUTTERS

THE SOLUTIONS PROVIDER FOR YOUR INDUSTRIAL CUTTING NEEDS

ENERPAC 

World-Class Cutters

When you need to make cuts through heavy-duty bar, chain, cable and similar materials, look no further than Enerpac's broad range of cutters.

An extensive lineup of hydraulic, electric and manual cutters provides a quick, safe and cost-effective solution for technicians from construction, mining, manufacturing and many other industries.

Enerpac's cutters are built to handle industrial-grade materials on a daily basis. Like all Enerpac tools, each cutter is designed and built to last in tough working conditions for a safer, simpler and more productive workflow.

Cutter Type		Maximum Tool Capability*	Series		Power Source	Pages
Bar Cutters		2.04" (Maximum Material Cutting Diameter)	EB		Hydraulic, Electric	4-7
Chain Cutters		1.25" (Maximum Link Cutting Diameter)	ECC		Electric	8-9
Wire and Cable Cutters		7.09" (Maximum Material Cutting Diameter)	EWC		Hydraulic, Electric	10-13
Flat Bar Cutters		2.75" x 0.59" (Maximum Material Cutting Height and Width)	EFB		Electric	14-15
Decommissioning Cutters		6.69" (Maximum Blade Aperture)	EDC		Hydraulic	16
Hydraulic Cutterheads		4.00" (Maximum Material Cutting Diameter)	WHC WHR STC		Hydraulic	17
Self-Contained Hydraulic Cutters		3.38" (Maximum Material Cutting Diameter)	WMC		Manual	18
Pumps and Accessories		2.5 Gallons (Usable Oil Capacity)	ZE6		Electric	19

* Actual cutting capabilities may vary depending on material being cut.

Your Fast, Safe and Simple Solution for Cutting Metal Bar

Internal Mechanics

EBH-Series: Cylinder is driven by an external Enerpac pump

EBE-Series: Cylinder is driven by a radial pump powered by an electric motor

Typical Bar Cutting Applications

- Commercial and residential construction
- Concrete and masonry
- Metal fabrication
- Industrial manufacturing

Productivity

- A broad range of hydraulic and electric tools quickly and easily cut through heavy-duty bar
- Highly durable, long-lasting blades outlast angle grinder or saw blades

Safety

- Controlled cutting process enhances user safety compared with use of cut-off blades
- Minimal spark risk compared to torching, grinding and sawing methods
- Cutters produce minimal vibration, helping prevent HAVS (Hand Arm Vibration Syndrome)

▼ Enerpac's bar cutters are built to handle tough cutting applications.

EBH-Series Hydraulic Bar Cutters

EBH-Series Hydraulic Bar Cutters

EBH-Series Hydraulic Bar Cutters are driven by a specialized external hydraulic pump for optimal power

and a higher duty cycle compared with other cutter types.

These cutters are ideal for use in production or manufacturing facilities with demanding, high-volume cutting applications.

- ① Highly durable blades maintain effectiveness throughout rigorous use
- ② Safety guard helps protect hands from injury
- ③ Heavy-duty cutting head provides a longer operational life
- ④ Lifting handle enables easier positioning and transport
- ⑤ Double-acting cylinder with advance and retract buttons improves control and reduces jamming
- ⑥ External hydraulic pump helps keep the tool cool, improving operational time (pump, hose, and pump coupler sold separately)

Drawings are for guidance purposes only, exact tool configurations vary by model.

Maximum Material Diameter* (in)	Model Number	Maximum Material Tensile Strength* (psi)	Maximum Material Hardness* (HRc)	Maximum Cutting Force (tons)	Maximum Hydraulic Operating Pressure (psi)	Dimensions (in)			Weight (lbs)	Replacement Blade Kit Number

EBH Series

Maximum Material Hardness:

43 HRc

Maximum Material Diameter:

1.18 - 2.04 inches

Maximum Operating Pressure:

10,000 psi

Pumps and Accessories

The EBH-Series Cutters are designed to work with ZE6410X-Series pumps.

Pump models vary by voltage type. The pump and hose are sold separately. Both are required for the system to function. See page 19 for complete details on required pumps and accessories.

Cutter Model Number	Pump Model Number	Hose Model Number
EBH30 EBH35 EBH52	ZE6410XG-S	CH720EC
	ZE6410XJ-S	
	ZE6410XK-S	
	ZE6410XW-S	

Optional gauges and accessories may be used to monitor pressure in the hydraulic circuit. Enerpac recommends **Gauge Kit GKHC** for use with Enerpac hydraulic cutters.

EBE-Series Electric Bar Cutters

The versatile EBE-Series Electric Bar Cutters quickly cut through heavy-duty bar up to one inch (26 mm) in diameter without the need for an external hydraulic

pump. Their compact size and low weight enable them to be easily transported and used wherever an external power source is available.

- ① Highly durable blades maintain effectiveness throughout rigorous use
- ② Safety guard helps protect hands from injury
- ③ Heavy-duty cutting head provides a longer operational life
- ④ Lifting handle enables easy positioning and transport
- ⑤ Piston-release mechanism allows blade to be reset, reducing jamming and providing a controlled cutting process

EBE Series

Maximum Material Hardness:

43 HRC

Maximum Material Diameter:

0.87 - 1.02 inches

Voltage:

120 and 230 Volts

* ETL certification applies to 120V tools only

HYDRAULIC AND ELECTRIC BAR CUTTERS

Typical Applications

Concrete contractors, metal fabricators and other similar companies cut high quantities of metal bar. This application is often performed using angle grinders with cut-off wheels, a solution known to pose a high risk of hand and face injuries. EB-Series Bar Cutters bring tremendous value to this application by increasing productivity, safety and ease of use.

Rebar Cutting

The highly portable EBE-Series tool cuts up to number 8 rebar (1" diameter) with minimal sparks, making it an extremely versatile tool on any construction jobsite.

Miscellaneous Metals Cutting

The EBE-Series Electric Cutters quickly and safely slice through round, square, hexagonal and octagonal steel bar up to 1.02" in diameter.

High-Volume Production Cutting

EBH-Series Hydraulic Cutters are ideally suited for use in metal fabrication shops where a high volume of cutting is required. A powerful external pump with a large reservoir enables the tools to withstand higher duty-cycles, and cut materials up to 2.04" in diameter.

ADVANTAGES

▲ *The fast, safe and simple solution for cutting metal bar*

PRODUCTIVITY

- Hydraulic and electric tools quickly and easily cut through metal bar
- Highly durable blades outlast angle grinder or saw blades

SAFETY

- Controlled cutting process safer than cut-off wheels
- Minimal sparks compared to alternative cutting methods

VERSATILITY

- Compact electric tools are easy to transport to the jobsite
- Powerful hydraulic tools withstand higher duty-cycles and cut larger materials

▼ Shown: ECCE32B-Series Chain Cutter

Your Simple Solution for Cutting High-Strength Industrial Chain

Internal Mechanics

ECCE-Series: Cylinder is driven by a radial pump powered by an electric motor

Typical Chain Cutting Applications

- Chain manufacturing
- Mining
- Rigging / material handling for transport
- Oil and gas
- Marine

Productivity

- Quickly cut through heavy-duty chain links with minimal effort
- Highly durable blades outlast angle grinder or saw blades

Safety

- Controlled cutting process behind a protective shield enhances safety
- Minimal spark risk compared to torching, grinding and sawing methods
- Cutters produce minimal vibration, helping prevent HAVS (Hand Arm Vibration Syndrome)

▼ Cut through chain links with ease using Enerpac's chain cutters.

ECCE-Series Electric Chain Cutters

ECCE-Series Electric Chain Cutters

ECCE-Series Electric Chain Cutters are ideal for applications where safety is paramount. Unlike other cutting methods, Enerpac's chain

cutters cut chain links behind an enclosed, transparent safety guard, protecting the operator's hands from potential injury while allowing the operator to monitor the cutting process.

- ① Highly durable blades cut through heavy-duty chain, maintaining effectiveness throughout rigorous use
- ② Transparent safety guard protects hands and allows continuous monitoring for better management of cutting process
- ③ Heavy-duty cutting head provides a longer operational life
- ④ Lifting handle and eyebolt enable easy positioning and transport
- ⑤ Double-acting cylinder improves control and reduces jamming

ECCE Series

Maximum Material Hardness:

46 HRc

Maximum Material Diameter:

1.25 inches

Maximum Grade Chain:

80

Voltage:

120* and 230 Volts

* ETL certification applies to 120V tools only

Voltage: (Model No. ending with suffix)

B = 120V, 60 Hz (with American-style NEMA 6-15 plug)

E = 230V, 50 Hz (with European-style SCHUKO plug)

Max. Material Diameter* (in)		Power Specifications				Model Number	Maximum Material Hardness* (HRc)	Maximum Cutting Force (tons)	Dimensions (in)			Cord Length (ft)	Wt. (lbs)	Replacement Blade Kit Number
Grade 40	Grade 80	Volts	Hz	Amps	Watts				A	B	C			
1.25	1.00**	120	60	11.0	1300	ECCE32B	46	52.9	27.5	7.5	12.6	6	106	ECCE3201K
1.25	1.00**	230	50	6.8	1400	ECCE32E	46	52.9	27.5	7.5	12.6	10	106	ECCE3201K

* Cutting larger chains or those of a grade higher than those recommended will result in increased wear, and may damage the tool. The risk of this may be minimized by cutting one link side at a time. See instruction manual for more information.

** One-inch grade 80 chain must be cut one side of the link at a time.

The Quick and Clean Way to Cut Cable and Wire Rope

Internal Mechanics

EWCH-Series: Cylinder is driven by an external Enerpac pump.

EWCE-Series: Cylinder is driven by a radial pump powered by an electric motor

Typical Wire and Cable Cutting Applications

- Telecommunications
- Electrical installation and maintenance
- Power generation and transmission
- Shipbuilding

Productivity

- A broad range of hydraulic and electric tools quickly and easily cut through cable and wire rope

Safety

- Controlled cutting process enhances operator safety
- Minimal spark risk compared with torching, grinding and sawing methods
- Cutters produce minimal vibration, helping prevent HAVS (Hand Arm Vibration Syndrome)

▼ *Guillotine-style blades make quick work of electrical cables and wire rope.*

EWCH-Series Hydraulic Wire and Cable Cutters

EWCH-Series Hydraulic Wire and Cable Cutters

EWCH-Series Hydraulic Wire and Cable Cutters are ideal for use in production facilities where demanding, high-volume cutting applications are often encountered.

Each tool is driven by a specialized external hydraulic pump, which provides greater cutting force and allows for higher duty cycles compared with other cutter types.

- ① Guillotine-style blades maintain effectiveness throughout rigorous use
- ② Cutting head can be opened and closed to help position material to be cut
- ③ Eyebolt facilitates easy lifting
- ④ Double-acting cylinder with advance and retract buttons improves control and reduces jamming
- ⑤ External hydraulic pump helps keep tool cooler and working longer (pump, hose, and pump coupler sold separately)

EWCH180

EWCH90

EWCH140

EWCH Series

Maximum Material Hardness (Cable):

43 HRc

Maximum Material Diameter:

3.54 - 7.09 inches

Maximum Operating Pressure:

EWCE-Series Electric Wire and Cable Cutters

EWCE-Series Electric Wire and Cable Cutters combine the efficiency and safety of their hydraulic counterparts with the greater portability of electric tools.

Their lighter weight allows for easier carrying and positioning. Available in 120V and 230V versions.

EWCE Series

Maximum Material Hardness:

48 HRC

Maximum Material Diameter:

1.65 - 2.17 inches

Voltage:

120 and 230 Volts

* ETL certification applies to 120V tools only

- ① Durable, guillotine-style blades maintain effectiveness throughout rigorous use
- ② Cutting head opens wide for easy positioning of wire or cable
- ③ Robust handles enable easy positioning and transport
- ④ Double-acting cylinder with directional control improves handling and reduces jamming

▼ Cut through wire and cables with ease.

WIRE & CABLE CUTTER

Typical Applications

Cutting heavy-duty wire ropes and cables using traditional methods can be an arduous and hazardous job. The material must be held in place while the operator attempts to cut through it, usually with an angle grinder or gas saw. This generally results in a shower of sparks and occasionally a decimated blade.

Wire Rope Cutting

Cutting wire rope with the EWCE-Series Cutter is simple. The head opens to allow the rope to be positioned. The robust blades slice through it in seconds, allowing the job to be done safely and quickly with minimal sparks and little effort.

Power, Networking and Communications Cables Cutting*

Power transmission, networking and communication cables are often supplied in large spools and cut on site. The EWCE-Series Cutter can easily be transported to the application, and slices through cables up to 2.17" in diameter.

Large Cable Cutting

The powerful EWCH-Series cutters facilitate the cutting of large wire rope and cables. Driven by an external hydraulic pump, three different cutter options cut through cables up to 7" in diameter.

ADVANTAGES

▲ The quick and clean way to cut cable and wire rope.

PRODUCTIVITY

- A broad range of hydraulic and electric tools quickly and easily cut through cable and wire rope
- Highly durable blades outlast angle grinder or saw blades

SAFETY

- Controlled cutting process is safer than cut-off wheels
- Minimal sparks compared to alternative cutting methods

SIMPLICITY

- Head opens for positioning
- Wire Rope or Cable is held in place by blades during cutting process

*  Wire rope must be securely taped or bound to prevent unraveling during cutting process.

▼ Shown: **EFBE5017B**

Cut High-Tensile Flat Bar With Ease

Productivity

- Cut through high-tensile flat bar in seconds
- Highly durable, long-lasting blades offer increased longevity and less down time

Safety

- Controlled cutting process enhances operator safety
- Minimal spark risk compared with torching, grinding and sawing methods

Internal Mechanics

EFBE-Series: Cylinder is driven by a radial pump powered by an electric motor.

Typical Flat Bar Cutting Applications

- Commercial and residential construction
- Industrial manufacturing
- Ornamental iron work
- Metal fabrication

◀ Cutting flat bar is fast and easy with EFBE-Series Cutters.

EFBE-Series Electric Flat Bar Cutters

EFBE-Series Electric Flat Bar Cutters

EFBE-Series Electric Flat Bar Cutters enhance workplace safety by replacing unsafe cutting methods with a precise, controlled cutting solution. Unlike standard bar cutters, the deep cutting head design accommodates metal bar up to 2 3/4" (70 mm) high and over half an inch (15 mm) thick.

A piston release mechanism allows the blade to be stopped and reset at any time, providing the operator with a high degree of cutting precision and control. EFBE-Series Cutters are perfect for use in industrial manufacturing facilities as well as steel and metal fabrication shops.

- ① Highly durable blades cut through flat bar, maintaining effectiveness throughout rigorous use
- ② Heavy-duty cutting head provides a longer operational life
- ③ Robust handle enables easy positioning and transport
- ④ Piston-release mechanism allows blade to be retracted, providing a controlled cutting process and reducing jamming

EFBE Series

Maximum Material Hardness:

33 HRC

Maximum Material Dimensions:

1.96 x 0.67 – 2.75 x 0.59 in.

Voltage:

120 and 230 Volts

* ETL certification applies to 120V tools only

* Cuts .50" alloy chain grade 70 (type G7 transport or tie-down) or grade 80 (for overhead lifting applications)

☆ Will not cut designated material

*** Low Alloy

ZE6-Series Electric Pumps

Two specialty Enerpac ZE6-Series electric pump models provide the precise flow required by Enerpac's hydraulic cutters. A specially adapted twin hose connects the pumps directly with the cutters, allowing for complete control from the cutters themselves.

Optional gauges and accessories may be used to monitor pressure in the hydraulic circuit. Enerpac recommends **Gauge Kit GKHC** for use with Enerpac hydraulic cutters.

ZE6 Series

Reservoir Capacity:

2.5 gal.

Motor Size:

7.5 hp

Maximum Operating Pressure:

10,000 psi

▼ ZE6-Series Pump

- **Controlled directly from cutter with no pendant required**
- **Powered by an induction motor for industrial applications that require extended duty cycles**
- **IP54 Rating for superior dust and water protection**

Hoses

Twin hose comes with hose couplers and is available with or without an electric cable and sheath.

Tools with electric controls require an electric cable. Each hydraulic cutter's required hose and/or cable model numbers are listed on their respective product pages.

ZE6-Series Pumps with 2.5-gallon reservoir

Drawings are for guidance purposes only, exact pump configurations vary.

Pump Model Number	Model No.
20 ft. long, twin hose with sheath and electric cable	CH720EC
20 ft. long, twin hose only	CH720MC
Sheath only	S720EC
Electric cable only	EW720EC

Pump Valve Type	Pump Model Number * (Single-Stage Pump)	Motor Electrical Specification	Motor Size (hp)	Weight (lbs)	Required Twin Hose Model Number** (sold separately)	Compatible Cutter Model Number (sold separately)
Manual	ZE6210XG-S	208-240 V-3 ph	7.5	170	CH720MC	EDCH130 EDCH145 EDCH170
	ZE6210XJ-S	460-480 V-3 ph				
	ZE6210XK-S	440 V-3 ph				
	ZE6210XW-S	380-415 V-3 ph				
Electric	ZE6410XG-S	208-240 V-3 ph	7.5	185	CH720EC	EBH30 EWCH90 EBH35 EWCH140 EBH52 EWCH180
	ZE6410XJ-S	460-480 V-3 ph				
	ZE6410XK-S	440 V-3 ph				
	ZE6410XW-S	380-415 V-3 ph				

* To add a roll cage to the pump, add an "R" prior to the "S" in the nomenclature, e.g. ZE6410XG-RS.

** Tool, pump and hose are all sold separately, and all are required for the system to function.

TOOL SOLUTIONS

Enerpac offers an extensive range of tools to ensure that even your most demanding applications can be undertaken with the highest degree of safety and accuracy.

Whatever your requirement—lifting, pressing, cutting, punching, spreading or bending; you can be sure that Enerpac has the correct tool to do your job safely and efficiently.

Specialty Cutters

Hydraulic and Mechanical Pullers

SP-Series Punches

STB-Series Pipe Benders
